Event Summary

We organized "Critical Thinking: Connecting The Dots" for second & third year Students of Electronics Hobby Club ,Department of Electronics and Communication Engineering. Generally critical thinking skills is being able to understand the logical connections between ideas, identify, construct and evaluate arguments, detect inconsistencies and common mistakes in reasoning. Later on students are set to start with the activities i.e Quiz, Pick Talk and Connecting the images to guess the given component. Our main aim of the event is to make students enrich their talents in thinking skills, logical skills. Firstly, all the teams started with quiz competition upon which we next started with connecting things where students are provided with number of pictures related to one of the electronics components where they have to connect the pictures and give the name. Lastly Pick talk, count of topics are given on the present technologies where each has set to pick one paper and talk on that particular topic in order to make the young minds know more about technologies which are in process and upcoming.
