Event Objective

The objective of the workshop is to provide hands-on experience on IoT projects using Cloud based Wi-Fi Module.

Event Summary

A Hands-on Workshop on "IoT Projects using Cloud based Wi-Fi Module" has been organized on 23.05.2022 by the student coordinators of IIoT club, Jansons Institute of Technology. During this IoT workshop, students practically learnt how to design an electronic device that can be connected to the internet to make it as an IoT device and they can also program it to notify the user whenever a harmful activity happens in the home so it can be used as a security device also. The session was very insightful and students had a hands-on experience in the smart automation projects. The focus of this workshop covered the basics of controller programming, IoT concepts, Development of IoT applications, Software platforms, IoT cloud services, usage of Wi-Fi modules and integration of the hardware and software modules. The program was an initiative towards imparting knowledge to the faculties and students about the IoT projects practically.
