- (d) Project lasting for two years.

10. Fill in the blanks with relative clauses.

- (a) I visited my uncle _____ lives in a different city.
- (b) Can you find the teacher _____ you talked to this morning?
- (c) Food _____ is imported from other countries is expensive.
- (d) Do you know the reason _____ there are no penguins at the North Pole?

11. Read the following passage and answer the questions that follow. (8 × 2 = 16)

Jacques-Yves Cousteau was well-known as an explorer of the sea and as an environmentalist, calling for the protection of the sea. He was also an inventor whose invention has helped many today to scuba dive.

Cousteau's dream was to be able to explore the sea freely. Before his invention of the Aqua-Lung, this was not possible. People were able to dive then. However, heavy helmet and boots, and a hose that supplied air, which was perhaps connected to a ship on the surface of the water, added to the cumbersome outfit. Divers could not move freely then but had to struggle across the seabed. This was not for Cousteau and he realized he could make vital changes. For air, the diver could carry a cylinder of compressed air with a hose that allowed him to breathe in and out. Through a joint effort with a French engineer, Emile Gagnan, the Aqua-Lung was eventually designed.

The Aqua-Lung was unique in that it allowed the diver to go to deep waters, yet, simultaneously, protected him from being crushed by the pressure of the water. The Aqua-Lung, in effect, opened up the sea to man. We can now explore underwater caves, study the wrecks of ships from long ago, and observe the behavior of underwater creatures.

Cousteau also oversaw the building of a tiny submarine called the 'Diving Saucer', which can collect underwater specimens and even take photographs. Thus, even if a person cannot dive to an area because it is simply too deep and dangerous, the 'Diving Saucer' can be used instead.

Through his work, Cousteau became aware of the increasing pollution of the sea. He wanted others to be aware of it also—the overfishing and the pollution that had damaged ocean life. Cousteau passed away in 1997, but his work is carried on by his son. Many people, who are just as concerned about the state of the oceans, continue to fight for the protection of the sea today.

Answer the following questions using complete sentences

- (a) Who is an environmentalist? Explain why Cousteau was called one?
- (b) Before the invention of the Aqua-Lung, why was Cousteau unable to explore the sea freely?
- (c) Why must air be supplied to divers?

- (d) Quote the sentence from paragraph 2 that tells us the Aqua-Lung was not the sole invention of Cousteau.
- (e) Based on paragraph 2, why is it not necessary for a diver using an Aqua-Lung to be connected to a ship?
- (f) What will too much water pressure do to a diver?
- (g) What does 'simultaneously' (paragraph 3) mean?
- (h) In what way had the Aqua-Lung 'opened up the sea to man' (paragraph 3)?

12. (a) Draft an email using the situation given below. The maximum length for each e-mail is 100 words.

Write to the person you are going to meet. What do you need to tell them? Perhaps you need to let them know what you want to discuss. Do you want them to arrange anything for you?

Or

- (b) Write a letter to the in-charge of the text-books section of NCERT, New Delhi complaining about the non-availability of textbooks even one month after the beginning of the new session. You are Pranav Baskar reading in St. Xavier's School, Delhi.
